G Series Motorised Retractable Monitors & Microphones

Overview

The SEADA G Series Motorised Retractable Monitors & Microphones benefits the more traditional Assembly/Chamber set up. Furthermore, it can also be an excellent tool in Meeting/Conference Rooms. By placing attendees around a table with monitors in front of them allows them to easily look at the information/presentation. This allows the attendees to look at their colleagues around them leading to more productive and collaborative meetings. The more traditional set up of a single screen at one end of the room leads to people having their backs to others and not engaging with them. Screen size can also be limited depending on ceiling height and access of Large Format Displays into the building/room. However with the SEADA G series Motorized Retractable Monitors that will not be a problem.

Having multiple screens across the table allows everybody to have a clear view. The frustration and stress of leaning in different positions to look at the board is now gone.

SEADA G series also can have an independent motorised retractable microphone built in to be used at conference rooms, meeting rooms, board rooms, auditorium and schools.

Features

- Motorised retractable monitor
- 0 ~ 90° adjustable monitor angle
- Touch screen
- Built in motorised retractable microphone
- Ergonomic design

- Integrated PC power switcher
- Touch screen
- Stylish design
- RS485 & remote control
- Low power consumption
