

Webinar Training

Webinar Training

Welcome to SEADA training webinar, during these webinars we will give you an insight into the product, an overview of the products key features, as well as various examples related to the product, followed by training material and a live demonstration, we hope that by the end of these training webinars you'll be confident in your ability and understanding of the unit.

[SWMicro & G Series Training Webinar - 11/11/2021 11AM - Click to Join](#)

The SWMicro series video wall controllers are the all-in-one solution available from SEADA Technology. Based on cutting edge crossbar express technology, they provide excellent performance and flexibility for video wall applications. The G Series of video wall controllers accept up to 8 HDMI inputs and displays them on up to 8 different displays, each with a resolution up to 4K@60fps. G Series not only allows the user to display a single input across all displays, but also to display input videos onto different screens working like a matrix switcher.
